

having a processor, the processor electrically connected to a memory device for storing and retrieving machine-readable signals in the memory device, to an input device for receiving input data and converting the input data into the input electrical signals, and to an output device for receiving the output electrical signals, and wherein the processor is controlled by a computer program to implement the step of producing;

assigning shipping information signals to the order;

linking, by digital communication, the signals representing the list with the shipping information signals;

transmitting the signals representing the list to, and receiving the signals representing the list at, a printer device at a distribution center located remotely from the order center; and

making the delivery customized and fulfilled just for the recipient, as specified by the list, in accordance with the shipping information signals, from the distribution center.

48
49. The method of any one of claims 44 – 48 further including the step of communicating an email confirmation of the order including a portion of the output signals sent by the digital electrical computer.

II. Remarks

Please enter the foregoing amendments and consider the application.

No new matter is believed to have been added.

As amended the above-identified patent application is believed to be in condition for allowance, and favorable action is respectfully requested.

The Commissioner is hereby authorized to charge any fees associated with the above-identified patent application or credit any overcharges to Deposit Account No. 50-0235.

Please direct all correspondence to the undersigned at the address given below.

Date: 19 Nov 1999

Respectfully submitted,

A handwritten signature in black ink, appearing to read "Peter K. Trzyna".
